Year	Air India	Indian Airlines
1999-2000	(37.63	51.42
2000-2001	(44.40)	(159.17)
2001-2002	2150	(199.35)
	(Budgeted)	(April to September 2001)

While Air India is expected to make profit this year after as gap of six years, Indian Airlines is able to contain its losses inspite of major cost increases in insurance premium, ATF prices, landing and navigational charges and poor traffic in the aftermath of terrorist attacks at Colombo in July 2001 and the incidents in US in September 2001.

(c) Air India has taken various steps to reduce the operational cost, which include:— (i) withdrawing of capacity from inherently loss making routes and redeploying it on more profitable routes; (ii) maximising the utilisation of the fleet within the constraints of pilot availability; (iii) dry leasing of aircraft to augment capacity; (iv) improvement in inflight service; (v) introduction of e-marketing effective January 2002 to enable passengers to make on-line bookings through the net; (vi) reduction in staff strength in India and abroad and (vii) abolition of several posts of India based officers abroad in the various departments.

Indian Airlines has taken following steps to improve revenue and contain operational costs; (i) Ban on direct recruitment from outside other than critical areas like Operations and Engineering; (ii) Route rationalization and deployment of aircraft based on market requirements; (iii) Introduction of market responsive flexi fare policy; (iv) Innovative market strategies; (v) Acquisition of aircraft on lease to replace aging aircraft/augmentation of capacity; (vi) Improvement in the quality of product/customer services and (vii) Cost Control and Economy Measures.

Modernisation of Ludhiana Airport

470. SHRIMATI GURCHARAN KAUR:
SHRI LAJPAT RAI:

Will the Minister of CIVIL AVIATION be pleased to state:
